Please find attached a fax received yesterday from Neil Thompson at DIAND Water Resources regarding a proposed workshop permit to discuss the U/G Storage of Anoxic Trioxide at the Giant mine.

Tim Acton and I were approached by DIAND on this issue back in July. We both see it as an excellent way to discuss the options for U/G Storage of AS with community leaders away from press scrutiny and in a non-confrontational venue. It is an excellent opportunity to educate community leaders and to flesh out the issues ahead of the public hearing.
