Ed// I received the attached letter from Laura Johnston this afternoon by FAX. LAURA Johnston is the Director of Environment Canada in the NWT and a member of the NWT Water Board. She also phoned me this afternoon but I was out in the field and consequently only got her voice mail message.

She is trying to find out through me if Ryo would be interested in entering into a negotiation process relating to control of arsenic and sulphur dioxide emissions from the Giant mine. Alternatively her TASK Force will be recommending that the Federal Government proceed to control emissions by means of regulation under the Canadian Environmental Protection Act. I would appreciate talking to you about this before I call her back. T/KO Larry Connell

TO: **WORKSHOP INVITEES and PUBLIC FORUM PARTICIPANTS**

FINAL REPORT

**WORKSHOP ON CONTROLLING ARSENIC RELEASES TO THE ENVIRONMENT
IN THE NORTHWEST TERRITORIES**

Attached for your information is the Final Report summarizing the discussions and recommendations from the ***Workshop on Controlling Arsenic Releases to the Environment in the Northwest Territories*** which was held July 14 - 15 in Yellowknife. We would like to thank all those who participated in the Workshop: your contribution to the exchange of information and viewpoints was instrumental to the successful development of workshop recommendations.

We anticipate that recommendations, based on the Workshop Report and the earlier Task Force Report, will be forwarded to senior managers in Environment Canada and Health Canada in early November. Upon receiving their endorsement, the recommendations will be forwarded to the Ministers of Environment and Health before Christmas for their consideration.

We will make every effort to keep you informed of the progress on this initiative throughout the coming months. If you would like a copy of the original Task Force Report or have comments on the enclosed report, please contact either Ed Collins (867) 669-4726 or me (867) 669-4725. We look forward to working with you in the near future to achieve a satisfactory resolution to the arsenic issue in Yellowknife.

Yours sincerely,

Laura Johnston
