MESSAGE:

Dave, I spoke with Ron Hilburn yesterday about the modelling work. He is progressing and expects to have a short fax together with a sensitivity analysis middle of next week. He will send this directly to you and to Neill Thompson (I will be on holidays, Neill is Assistant Director of my Division). Then, it would be best if you and Neill could get together and pull together an answer based on cost, engineering, feasibility etc. as to which options he should continue pursuing and which ones to abandon. Then Ron can do the control option assessment. Draft report still due by fax morning of March 20.

Will you be answering Ron's questions about arsenic controls? Ron also wonders still about 65 what? I told him to work with 65 imperial tons because you sell ounces. Contact him if this is wrong.

If you have questions contact Neill Thompson at 873-7654, fax 873-0221.

cc Ron Hilburn
