Attention: David H. Anthony, P. Eng.
Manager, Environmental Services

Atmospheric Dispersion Modelling

Dear Mr. Anthony

At your request, we have reviewed the scope of work and our proposed fee basis for the above project on the understanding that the client groups require a reduction in the project costs. We have discussed this matter with our named subconsultant and confirmed that our proposed methodology, and respective fees can not be reduced.

A separate letter has been sent directly to Mr. Jim Sparling, Renewable Resources. We regret that we could not assist you in the reduction of the costs on this project.

Yours Truly
M. M. DILLON LIMITED

Gary Strong, P. Eng.
