

August 5, 1965

Mr. J. W. Grainge,
District Engineer,
Department of National Health and Welfare,
Public Health Engineering Division,
541 Federal Public Building,
Edmonton, Alberta.

Dear Mr. Grainge:

Your letter to Mr. DeLaPorte requesting a sample of water containing a trace of gold, has been forwarded to me for attention.

In accordance with your request we are shipping via bus, a gallon sample of water containing approximately 0.25 mg. gold.

This sample was prepared in the laboratory from lake water and a non-lethal gold solution. I hope this sample will be suitable for your requirements, however, if it is too dilute, kindly inform me what concentration of gold you desire and I can prepare another sample to your specifications.

Yours very truly,

GIANT YELLOWKNIFE MINES LIMITED
