Mr. M. F. Gills,
Public Health Inspector,
Medical Health Clinic,
Yellowknife, N.W.T.

Dear Frank:

Re: Water samples

I have ~~just~~ returned from vacation and note that you haven't received any of our check analyses of the water sample you took during August. Please find these enclosed.

One curious thing we noticed was that the tap water samples you took assayed almost double the ones we took. Our samples are taken in the Assay Office. Would you let me know where you take your samples? We would also appreciate learning how our results match with your Vancouver results.

Due to the pressure of work in our laboratory I would like to restrict our check analyses to the weekly tap water samples. I trust that this will be satisfactory. The results of your other samples are of the same general magnitude as the results I obtained in July.

The next time you are out to Giant perhaps we could get together and talk over any problems you might have.

Yours very truly,
