

**ROYAL OAK MINE**  
**NWT Division - Giant Mine**

**TO:** Phil MacIntyre  
**CC:** Allen Jones, Dave Power  
**FROM:** Vi Lau-a  
**DATE:** August 11, 1995  
**SUBJECT:** 1995 Air Sampling Schedule

---

Air sampling is done on a three month rotation schedule (with the exception of the Refinery which is sampled once a month).

Silica Dust was dropped from the parameter of analysis since it was proven that our ore contains below the acceptable limit values.

**Month 1:** (January, April, July, October)  
**Month 2:** (February, May, August, November)  
**Month 3:** (March, June, September, December)

**Month 1:** Mill (Dust)  
- Under Fine Ore Bins  
- #2 Mill  
- Solution Desk  
- Flotation Bench  
- Cyanide Mix Area  
- Refinery (Dust & Arsenic)

**Month 2:** Crusher (Dust)  
- Wood Picker  
- Jaw Crusher  
- Cone Crusher  
- Crusher Control Room  
- Top of Fine Ore Bins  
- Screen Floor  
- Refinery (Dust & Arsenic)

**Month 3:** Roaster (Dust & Arsenic)  
- Carbon Plant  
- Roaster Filter Floor  
- Roaster Top Floor  
- Roaster Control Room  
- Cottrell Top Floor  
- Cottrell Bottom Floor  
- Cottrell Control Room  
- Baghouse Bottom Floor  
- Baghouse Top Floor  
- Refinery (Dust & Arsenic)
