

Feb 21/56

Rob:

Flow Rates  $\pm .15$

1505  $\pm 1$  - .37 - estimate

1505  $\pm 5$  - 4.27 - estimate.

Checked with Mill and they  
were pumping Arsenic and B. head  
was weeping as you expected.  
Sample taken at 12:AM

I could get accurate Flow  
Rates on  $\pm .15$  if I put  
Dia Drill plug in hole's and  
valve the ends - let me know  
if you would prefer this
