---

Enclosed is a copy of our new corporate brochure which provides a brief overview of Entech Environmental.

Should you have any questions or wish to discuss specific projects and/or requirements, please contact us at (403) 250-3532.

Thank you for taking the time to review this material and we wish you all the best in 1995.

Yours truly,

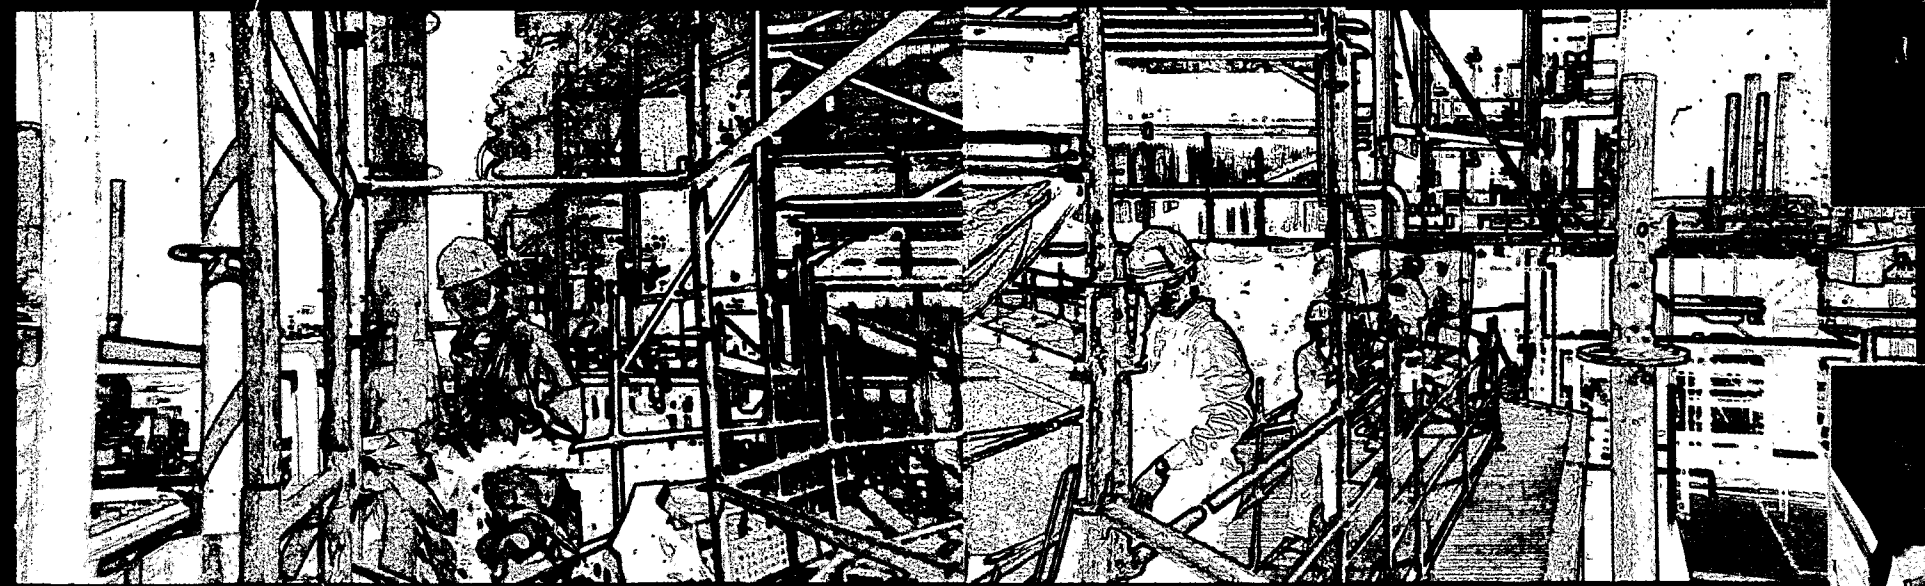

A handwritten signature in black ink, appearing to read "John A. Jackson". The signature is fluid and cursive, with the first name "John" and last name "Jackson" clearly distinguishable.

John A. Jackson, R.E.T.  
President

Entech Environmental is a multi-discipline company specializing in air emission testing and monitoring. We are dedicated to providing accurate, timely and cost-effective services to industry.

The Field Services team has expertise in organic sampling techniques and compliance reference methods for the full spectrum of stack emissions. Our in-house Analytical Group complements this service with a customized laboratory combining sophisticated analytical instrumentation with classical chemical techniques to provide prompt, efficient and reliable analytical results.

Our Continuous Monitoring team utilizes state-of-the-art instrumentation to monitor air emissions at both stack and ambient levels.

Entech has provided services to a wide range of industries including: electric utilities, pulp and paper mills, sour gas plants, refineries, cement plants, fertilizer plants, waste incinerators, co-generation units and compressor stations.

Our goal is to utilize the latest techniques and protocols to provide our clients with the highest quality data possible. In meeting this objective, Entech has been instrumental in the development of new methods, techniques and equipment for a wide range of applications.

## STACK SAMPLING

- Compliance Stack Tests
- Pollution Control Performance Tests
- Trial Burns
- Fugitive Emissions Tests
- Process Stream Testing
- Volatile and Semi-volatile Organics Tests

## CHROMATOGRAPHY ANALYSIS

- On-site Analysis
- Turn Key Systems
- Specialty Applications

## LABORATORY ANALYSIS

- Water
- Air
- Hydrocarbons
- Sulphur Compounds

## EQUIPMENT

- Sales
- Rental
- Calibration
- Repair

## TRAINING

- Stack Sampling
- Stack Sampling Reporting
- Ambient Monitoring
- Gas Chromatograph Systems

## CONTINUOUS MONITORING

- Instrument Method Stack Surveys
- C.E.M. Certification
- Plant Performance Tests

## AMBIENT MONITORING

- Compliance Monitoring
- Turn Key Systems
- Station Audits
- Rental and Repair Services
