Hon. Marc Lalonde
Dept. of National Health & Welfare
Brooke Claxton, Bldg
Ottawa, Ontario

Dear Sir

Information Services of the National Indian Brotherhood maintains a collection of published and unpublished materials, - briefs, reports, papers, studies, etc. - on Indian education, housing, economic development, social and economic conditions, aboriginal rights, Indians and the law, government relations, communications, the environment, etc.

The main purpose of Information Services is to provide up-to-date information quickly to the executive, programme directors, and the supportive staff of the National Indian Brotherhood, on topics in the above-mentioned fields of interest.

Could you send (and bill us if necessary), the item(s) listed below? If you do not have these items, could you tell us how they may be obtained? Thank you for your co-operation on this.

Study prepared in 1966 by the Dept. of National Health and Welfare, indicating sickness and death in Yellowknife, possibly relating to arsenic from nearby mines - as reported on the CBC radio program, "As It Happens," Wednesday, Jan 8.

Sincerely,

Brian Deer

A. Brian Deer
Director, Information Services
