Northern Region

DATE May 19 1971

SUBJECT
Sujet

ENVIRONMENTAL HEALTH SURVEY, YELLOWKNIFE, N.W.T.

With reference to your letter of May 14, 1971, and the attached report, I have perused same and the only positive finding which could be directly attributable to arsenic is the increase in skin diseases as compared to the rest of the country.

I feel we have to release a few copies of the full report to:

- (a) The Commissioner of the Northwest Territories
- (b) The Mayor of Yellowknife

A suitable summary of the report should be prepared for general distribution to those who will request information on the report.

J. C. D.L.
Regional Director

cc - Mr. S. M. Hodgson, Commissioner, N.W.T.
