Arsenic Study - Yellowknife

We have received a photocopy of a letter from the Secretary - Treasurer of the City of Yellowknife to you dated 9 June 1970, concerning the arsenic study carried out in Yellowknife a number of years ago.

We have been in touch with the Occupational Health Division and unfortunately both Dr. de Villiers and Dr. Patterson are absent on annual leave. No report can be expected until their return next month (August). And this is no assurance that it will even be ready in August, however, we will continue to keep the pressure on.

Original Signed by
DR J H WIEBE
