Dr. G. Butler, Regional Director
Medical Services
Northern Region
12710 - 114 Avenue
Edmonton, Alberta

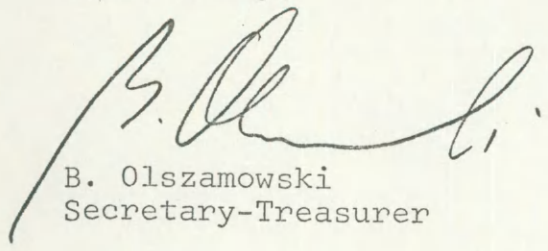

Dear Sir:

Re: Memorandum dated January 7, 1970 addressed to the Regional Director, Northern Region from the Acting Director General, J. H. Wiebe, M.D., M.P.H. concerning the arsenic study carried out in Yellowknife.

At the last regular meeting of Yellowknife City Council May 25, 1970, Item 81, it was requested that a letter be written to enquire when the above-mentioned report can be expected. Enclosed is a copy of this memorandum which is self-explanatory.

Your early reply will be appreciated.

Yours truly,

B. Olszamowski
Secretary-Treasurer

Health Board

cc. [unclear]
cc. Chief, Environmental Health

M18
Dr Butler has sent a copy next month to the chief, Environmental Health so I presume they will reply in due course.
M67
Do you think intra-departmental memos should be sent to external agencies?
M16

M16

I agree that it is better not to, but there may be exceptional cases.

I think we should check E. And to see what is happening, possibly M18 could.

DATE January 7, 1970.

Regional Director,
Northern Region.

Acting Director General.

Arsenic Study - Yellowknife.

Dr. de Villiers has indicated today that they are progressing slowly with the report on the study done at Yellowknife. They have just received a new statistician who will be able to work with the data, and the final report can be anticipated by the end of March.

At our request, Dr. de Villiers agreed to contact you by phone in order to determine if there is any specific information which you require immediately, which is also presently available in the incomplete report.
