William Blythe and Co. Ltd.,  
Church, Accrington  
Lancashire BB5 4PD  
England

Dear Tom:

This is a belated thank you for having come to Toronto to outline your progress on research using Giant material, and also to explain how you feel a long-term relationship with Giant might develop.

With reference to the pilot stage, we have lined up a supply of drums should you want the shipment of 70 tons as mentioned during our meeting. We will be interested to learn whether Bill Drinkard prevailed upon you to have the work done in North Carolina.

Enclosed is a copy of our latest annual report which I thought you might like to have. We had a better year, largely as a result of good gold output from Salmita, our new mine about 250 km northeast of Yellowknife. It is a tough location in the barren lands where temperatures go to -50°C and there are white out conditions. If you do make a trip this way, I will have to take you in for a look see.

With best regards and we will be waiting for your instructions on the next shipments.

Sincerely yours,

GIANT YELLOWKNIFE MINES LIMITED
