Yellowknife, N. W. T.  
XIA 2M2

Dear Mr. Morton:

### Bulk Transport -- Arsenic Trioxide

I refer to your 08 January 1988 letter regarding the bulk transport of arsenic trioxide by Giant Yellowknife Mines to southern consignees.

I agree with your suggestion that a review be undertaken of the conditions contained within the 30 January 1981 Environmental Protection Act order regarding arsenic trioxide transport. It is suggested, however, that this review be conducted following the Giant Yellowknife Mines evaluation of their crude arsenic trioxide upgrading pilot test and following decisions being made on the proposed transport mechanisms; those being road only or road to rail transfer in Enterprise.

I am suggesting that Giant Yellowknife Mines and officials from this Department meet to discuss revisions to the outstanding order once this information is made available. Please contact this office when you wish such a meeting to be convened and the appropriate arrangements shall be made.

Yours truly,
