Subject Dust Collection System - Crusher House, Screen House

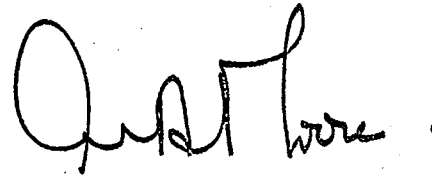

Date June 16, 1977
Ref.

We want to make the present system as workable as possible. The Sly Dust Collector has new bags installed. A new cone has been ordered for the cyclone. The next thing to do is to fix up the collection points.

If our draughtsman could go with Kent Morton to the Crusher House to make some sketches and measurements of sheet metal hoods which we will get made up locally in town, this would be a big help.

Just do 3 or 4 at a time, in order to get this work started quickly, so we can get some benefit from our efforts.

In the meantime, people working in the Crusher House must wear dust masks.

W. A. Moore
