Re: DSS Contract # 04 SS KE 204-7-EP113

We have spoken to Dr. Salloum and J.S. Scott concerning this work and are in general agreement that it should be done. Indeed we are trying a plant scale test using ferric sulphate, and it would certainly be to our advantage to be able to stabilize the precipitate produced.

We are shipping to your plant this week two samples, one of the ferral tailings filter cake, and the other of a dust barren slurry. We would be interested in learning of the results of your test work.
